

Griswold, C. E. & J. Ledford. 2001. A monograph of the migid trap door spiders of Madagascar and review of the world genera (Araneae, Mygalomorphae, Migidae). Occas. Pap. Calif. Acad. Sci. 151: 24.

***Paramigas manakambus*, new species**

(Figs. 38A–H, 65, 68)

Type.—Holotype male collected at Forêt bac jaune, Manakambahing Atn., Madagascar, 1–17 January 1991 by A. Pauly, deposited in MRAC (#174.501).

Etymology.—The specific name is an arbitrary combination of letters.

Diagnosis.—Distinguished from other *Paramigas* males except *P. macrops* by having AME larger than ALE (Fig. 38A), the thoracic fovea recurved and metatarsus I not swollen retrolaterally (Fig. 38C), and from *P. macrops* by having only an apical megaspine on tibia I, metatarsus I flattened dorsally (Fig. 38C) and tarsi III and IV curved and swollen (Fig. 38D).

Description.—Male (holotype): Total length 7.9. Carapace (Fig. 38A) dark red-brown with a dark band around margin, dusky on clypeus and along anterior margins of caput; ocular area black except between PME; sternum, coxae, and trochanters yellow-brown; dorsal surfaces of legs I through IV dark red-brown gradually fading to yellow-brown on ventral surfaces and on tarsi; pedipalpi dark yellow-brown; abdomen dark purple-brown except spinnerets and anteriad of epigastric furrow yellow-brown.

Carapace 3.35 long, 3.4 wide, height at thoracic fovea 0.26 × carapace width, rugose. Caput low, height 1.38 × that at thoracic fovea, width 0.57 × carapace width; ocular area with single seta situated between AME and a pair of setae positioned anteriad to this; clypeus length 0.34 × length OAL, slightly procurved. Thoracic fovea tripartite, recurved, width 0.16 × that of carapace, 2.3 × wider than long, with minute pair of prefoveal setae.

Ocular area width 0.55 × caput, 1.86 × wider than long; AER 1.05 wide, 1.07 × width PER. Ratio of eyes: AME: ALE: PME: PLE: 1.0: 0.6: 0.4: 0.5, diameter AME 0.25; AME separated by 0.4 × their diameter, PME by 3.6 × their diameter. Ocular quadrangle 1.22 × wider than long, posterior width 1.03 × anterior.

Sternum 1.9 long, 1.75 wide, widest behind coxa II and narrowed anteriorly; sigilla 0.2 × width sternum, irregular, adjacent to coxa II, distance between 1.25 × distance from margin. Labium and pedipalpal coxae lacking cuspules; labium 0.6 long, 0.65 wide, pedipalpal coxae 1.1 long, 0.6 wide, apex produced to a blunt point. Chelicerae 0.9 long, promargin of fang furrow with 3 teeth, retromargin with single basal tooth and 6–7 distal denticles (Fig. 38B).

Femur I 0.94, tibia I 0.63, femur IV 0.92, and tibia IV 0.69 × width carapace. Scopulae restricted to tarsi I–IV, I very weak. Metatarsus I (Fig. 38C) slightly flattened dorsally, tibia III with weakly defined dorsobasal excavation and tarsi III and IV elongate, dorsally concave and swollen ventrally (Fig. 38D). Spination: leg I: tibia r 0-0-0-1a, d 5 minute apical spinules, metatarsus d 17 minute spinules at tibia-metatarsus joint; leg II: tibia d 8 minute apical spinules, metatarsus d 13 minute spinules at tibia-metatarsus joint; leg III: patella with approximately 31 spinules, tibia with approximately 14 minute dorsoapical spinules; leg IV: patella with approximately 50 spinules. STC teeth (pro, retro): I-IV (1-1). Leg measurements (Femur + Patella + Tibia + Metatarsus + Tarsus = [Total]): I: 3.2 + 1.5 + 2.15 + 2.15 + 0.9 = [9.9]; II: 2.95 + 1.45 + 1.85 + 1.9 + 1.05 = [9.2]; III: 2.1 + 1.0 + 1.4 + 1.5 + 1.2 = [7.2]; IV: 3.15 + 1.5 + 2.35 + 2.05 + 1.55 = [10.6]; pedipalpus: 1.4 + 0.75 + 0.95 + (absent) + 0.6 = [3.7].

Pedipalpus (Figs. 38E–G) with femur 0.72, tibia 0.49 × carapace width; femur 2.33, tibia 1.58 × length tarsus; tibia ventrally concave (Fig. 38G) with approximately 10 elongate setae on ventral surface, height 0.52 × length; approximately 4 spines at apex of tarsus; bulb width 1.16 × tarsus length; embolus length 0.53 × bulb width. Abdomen 3.65 long, 2.7 wide, sparsely covered with short setae.

Material Examined.—Only the type.

Distribution.—Known only from the type locality in eastern Madagascar (Fig. 68).
