

SPECIES REMOVED FROM ACULEATA

Shandongodes necrodes J.F. Zhang, 1985:35. Holotype: ♀, China: Shandong Province: Laiyang District: Tuanwang (Shandong Provincial Museum, Shandong, China). Age: Lower Cretaceous (as Upper Jurassic), Laiyang Formation
Removed from Aculeata by Rasnitsyn, Jarzembowski, and Ross, 1998:370 because of an external ovipositor (ovipositor invisible on the original illustration, but detected by Rasnitsyn on the photograph received from J.F. Zhang; personal communication of A.P. Rasnitsyn of 6 August 2020).
