

C O R R I G E N D A

I. H o m o n y m y:

1. Trypoxylon nasutum Tsuneki, 1979 (nec 1974):  
Trypoxylon varipes nasutum Tsuneki, 1974, Ann. Hist. Nat. Mus. Nat. Hung., 66: 365  
(♀, North Korea).  
Trypoxylon nasutum Tsuneki, 1979, SPJHA, 9: 37 (♀, Malaya) ----->  
Trypoxylon minahime Tsuneki, nom. nov.
2. Trypoxylon venustum Tsuneki, 1979 (nec 1977):  
Trypoxylon venustum Tsuneki, SPJHA, 2: 8 (♂, Taiwan).  
Trypoxylon venustum Tsuneki, *ibid.*, 9: 63 (♂, Laos) ----->  
Trypoxylon bolouense Tsuneki, nom. nov.
3. Trypoxylon rufiventre Tsuneki, 1990 (nec 1976):  
Trypoxylon rufiventre Tsuneki, 1976, Steenstrupia, 4: 81 (Philippine: Tawitawi).  
Trypoxylon rufiventre Tsuneki, 1990, SPJHA, 36: 85 (♀ ♀, Okinawa) ----->  
Trypoxylon katsuuense Tsuneki, nom. nov.

(Thanks to Dr. Antropov, Moscow, who kindly pointed out the third homonymy)

II. M i s p r i n t:

1. Jejonogonalos marujamae sp. nov., Tsuneki, 1991, SPJHA, 37: 32.  
The specific name of this species should be read as marujamae. The fact that it is misprinted is clear, as in the key (p. 3) and index (p. 68) it is correctly printed as marujamae.

PRESERVATION OF THE TERANISHI'S COLLECTION OF THE TRIGONALIDAE

The Teranishi's collection of the Trigonaliidae, including all of the genotypes, holotypes and paratypes of the genera and species described by him or by me which had been kept in my laboratory was recently sent to the Osaka Museum of Natural History, Nagai Park, Higashi-Sumiyoshi-Ku, Osaka, 546 Japan, for forever preservation, as Osaka is the native place of the later Mr. Teranishi.
